Positive Solutions for Families

(A Course Designed Specifically for Families of Children Ages 3 - 8 years)

Developed by the Center on the Social and Emotional Foundations for Early Learning (CSEFEL), Positive Solutions for Families is an evidence-based, user-friendly parent training series of six modules to help professionals working with parents promote positive and effective parenting behaviors, which will in turn promote children's social and emotional development and address the challenging behavior and mental health needs of children in early childhood programs (ages 3-8). The training materials provide information for families on how to promote children's social and emotional skills, understand their problem behavior and use positive approaches to help children learn appropriate behavior. .
